Summary

Frontend Engineer with 3+ years of experience building scalable enterprise and government web applications using React.js, Next.js, Typescript, and modern frontend technologies. Specialized in responsive UI development, frontend architecture, authentication, accessibility (WCAG), and performance optimization. Experienced in building AI-powered enterprise solutions using Microsoft Copilot Studio, Power Automate, Power Apps, and Power BI.

Experience

Associate Consultant

Jan 2024 – Present

Ernst & Young (EY) — Delhi, India

AI-Powered HR Assistant

- Designed and implemented an enterprise HR assistant using **Microsoft Copilot Studio** to streamline employee self-service and support operations.
- Built **agentic conversational workflows** for leave management, onboarding guidance, HR policy assistance, and document retrieval.
- Automated approval and escalation workflows using **Power Automate**, reducing manual operational effort.
- Integrated organizational knowledge sources to deliver context-aware responses and improve information accessibility.
- Collaborated with business stakeholders to define conversation flows and optimize employee support experiences.

ICS 2.0 – Immigration Control System

- Developed scalable React.js applications supporting **10,000 + daily users** across airport and seaport immigration systems.
- Built reusable UI components that reduced development effort across multiple module.
- Optimized frontend performance by refactoring legacy code, resolving **100+ issues**, and improving maintainability by **30%**.
- Developed analytical dashboards in Power BI to monitor immigration activity, operational performance, and clearance metrics.
- Integrated hardware and system interfaces, including camera, biometric, QR, and PRM devices, to automate passenger clearance processes.
- Mentored a team of 10+ frontend developers and contributed to architectural decision-making.
- Collaborated with backend, DevOps, and security teams to ensure secure data exchange and production stability.

GOV.IN & DBIM Platforms

- Developed **9+ production-grade government portals** using Next.js with Server-Side Rendering (SSR).
- Achieved **90+ Lighthouse Accessibility Scores** by implementing WCAG-compliant UI components.
- Integrated multilingual support using **Bhashini APIs**, improving accessibility for diverse users.
- Collaborated with NIC stakeholders to compliance with **GIGW** and **DBIM** standards.

Skills

AI Automation & Analytics: Microsoft Copilot Studio, Power Automate, Power Apps, Power BI

Frontend Technologies: React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Sass

UI & Styling: Material UI, Tailwind CSS, Bootstrap, Chakra UI, Ant Design, Shadcn

State Management: Redux, Zustand, Recoil, React Query

Databases & APIs: Postgresql, REST APIs

Tools Git, GitHub, Docker, Postman, Firebase, Figma

Education

Bachelor of Technology (B.Tech) — Computer Science and Engineering

Aug 2019 – May 2023

Jaypee University of Engineering and Technology (JUET), Guna, MP

CGPA: 7.1 / 10.0

Achievements

- Received the **Extraordinary Contributor Award at Ernst & Young LLP** for outstanding performance as a Frontend Developer.
